DETAILED ACTION

Specification

1. The Brief Description of Drawings refer to Figure 2A-E but Figure 2F is in the Drawings. Corrections is required.

2. The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A) Claim 1-24 are indefinite because the claim as written is drawn to a means. The use of the term in this manner is highly unconventional. Claims are drawn to either product or method of using or method of making, it is unclear as to what the metes and bounds of the scope of the claim are. The term may be amended to "device".

Art Unit: 1656

B) Claims 1-12 are indefinite because the designations e.g. (1) throughout the claims. It is unclear as to what limitations are being referred to presumably from the drawings. Deletion of such references is required.

C) The use of the term “characterized ” throughout claims 1-24 renders the claims indefinite because it cannot be determined as to what limitations or characteristics are encompassed by the phrase. Deletion of the phrase is required.

D) Claims 13-24 are indefinite because the term particularly renders claim 13 indefinite. It is unclear as to whether thin film devices is limitation or not.

E) Claims 13-24 are confusing because they are drawn to a method but no clear and defined steps are recited. While minute details are not required in method claims, at least the basic steps must be recited in a positive, active fashion and clearly refer back to the preamble of the claim. See ex parte Erlich, 3 USPQ2, p. 1011 (Bd. Pat. A.P. In. 1986). It is suggested that all claims be amended to set forth active steps.

F) Claims 1-24 are grammatically confusing. It cannot be determined what the limitations of the claims are. Correction is requested.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Bamdad et al (US6,322,979 Nov. 27, 2001).

Bamdad et al teach a biosensor with molecule the formula X-R-Ch to self assembled monolayer (see whole document esp. abstract). The biological material may be DNA (see example 10). The surface may be gold surface which is electrical conducting (see col. 2line 25).
